

It's important for you to know where your donations go. Below is a brief overview of some of the children that have been aided from the generosity and kindness through donations to the AUBREY ROSE FOUNDATION.

CEDRIC is diagnosed with *Failure to Thrive!* Cedric's parents are asking for help with his hospital stay to determine what is wrong with him. This is an ongoing battle with many tests, but his parents finally received his diagnosis!

ARF paid for his week stay in the hospital!

BAKOR is one and half years old and has *Down Syndrome*. He also has an airway disorder called *Laryngomalacia*. Bakor's parents are asking for his hospital co-pay to be paid. This is a life-long problem for Bakor and his family.

ARF funded his in-patient hospital co-pay!

MICAH was diagnosed with *CMS* which causes him to eat and drink all of his food through a feeding tube and be on oxygen as well. Micah can't play on the playground, run around outside or ride a bike without someone carrying his oxygen tank. Micah needs an oxygen concentrator so he can be

like a "normal" child and play outside.

ARF funded his oxygen concentrator!

DAMIEN has a condition that causes his body to vomit until his body goes into shock! His parents constantly are on the lookout for what he eats or plays with that contains triggers. At any given time, Damien can be exposed to triggers or a virus that can cause him to deteriorate quickly and dangerously. It is terrifying!! Damien's parents need help with their hospital co-pay.

ARF is paying his medical bills!

HAYLEY is a 2-year-old beautiful little girl who required a bowel resection surgery on the day she was born. She lost most of her bowel which left her with short bowel syndrome and is fully TPN (Lipids & fats) dependent. Hayley was never bottle fed because she lost her instinct to eat, drink and suck.

ARF is funding her feeding specialists so that Hayley can grow!

VALENTINA is a 7-year-old girl who has *ALL*. Valentina received an allogenic transplant and was discharged from the hospital but needs to be seen in clinic 3 times a week. The family is really financially struggling to pay all of her co-pays.

ARF is helping with her RX and medical bills!

These families are asking for help because co-pays are too much, the bills themselves are cost prohibitive and also, insurance will not help with these specific bills. Because of the child's condition, some families have reached the maximum that insurance will cover ... you can call these kiddo's the million dollar babies! These are just a few of the reasons why families reach out to the Aubrey Rose Foundation.

There are very few organizations like ours that will actually help families with their children's medical bills and sometimes these families just need a little bit of help and that is exactly what the Aubrey Rose Foundation does!

Thank you from the *Bottom of Our Hearts and Double Lungs* for your kindness and generosity!
